<p>(54) Title: ANIMAL GENE THERAPY</p> <p>(57) Abstract</p> <p>The present invention relates to DNA sequences, expression cassettes and DNA constructs for use in therapy, specifically in gene therapy for the treatment of infectious diseases such as mastitis. Also included are pharmaceutical and veterinary compositions containing the constructs, and cells which have been transformed with the DNA and which are suitable for implantation into a host mammal. The gene therapy of infectious diseases can be effected <i>in situ</i> in targeted tissue or systemically.</p>
